

## Bird Spikes

Bird spikes are used for building edges and other surfaces to stop pest birds landing.

Such as:

- Rooftops & ledges
- Windowsills & railings
- Chimneys & billboards

### Material:

UV protected polycarbonate

Will not deteriorate under extreme temperatures.

High standard stainless steel: 304

Spikes: 1.3mm x 11cm

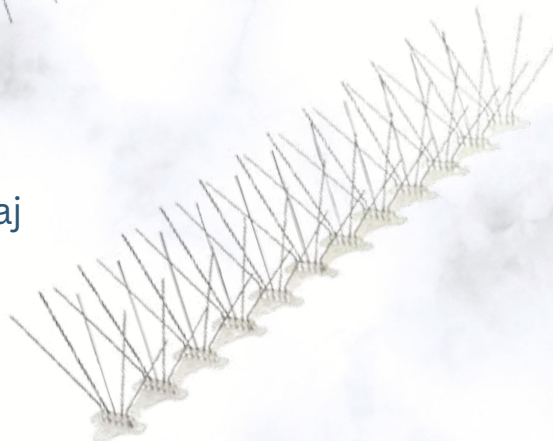

Spikes Number: 60 spikes

### Installation:

First of all, the surface should be clean and dry before installation.

A. If using on a wooden or concrete surface, simply use the screw.

B. If using on a plastic surface, the spikes can be fixed in place with glue, tape, plastic ties, or installation clamp.
